Create Disequilibrium State Focus Area

- [ ] highlight need to organize community differently
- [ ] cultivate a passion for action
- [ ] manage initial starting conditions
- [ ] specify goals in advance
- [ ] establish appropriate boundaries
- [ ] embrace uncertainty
- [ ] surface conflict
- [ ] create controversy

Close Window

Amplify Action Focus Area

Close Window

- [ ] enable safe fail experimentation
- [ ] enable rich interactions in relational spaces
- [ ] support collective action
- [ ] partition the system
- [ ] establish network linkages
- [ ] frame issues to match diverse perspectives

Encourage Self-Organization Focus Area

Close Window

- [ ] create correlation through language and symbols
- [ ] encourage individuals to accept positions as role models for the change effort
- [ ] enable periodic information exchanges between partitioned subsystems
- [ ] enable resources and capabilities to recombine

Stabilize Feedback Focus Area

Close Window

- [ ] integrate local constraints
- [ ] provide a multiple perspective context and system structure
- [ ] enable problem representations to anchor in the community
- [ ] enable emergent outcomes to be monitored

Enable Information Flows Focus Area

Close Window

- [ ] keep community members informed and knowledgeable on forces affecting the community
- [ ] assist in the connection, dissemination and processing of information
- [ ] enable connectivity between people who have different perspectives on community issues
- [ ] retain and reuse knowledge and ideas generated through interactions

Public Administration - Adaptive Community Interface

Close Window

- [ ] public administrators frame policies to enable community adaption of policies
- [ ] remove information differences between workers and citizens
- [ ] encourage and assist workers to take into account the ideas and views of citizens

Elected Government - Adaptive Community Interface

Close Window

- [ ] elected members frame policies to enable community adaption of policies
- [ ] encourage and assist elected members to take into account the ideas and views of citizens

Community Innovation - Public Administration Interface

Close Window

- [ ] encourage and assist workers to exploit the knowledge, ideas and innovations of citizens
- [ ] bridge community-led activities and projects to the strategic plans of governments
- [ ] gather, retain and reuse community knowledge and ideas in other contexts

Community Innovation - Elected Government Interface

Close Window

- [ ] encourage and assist elected members to exploit the knowledge, ideas and innovations of citizens
- [ ] collect, analyze and reuse community information that is relevant to elected member's responsibility
